

Tiziano Bellezze is Associate Professor of Materials Science and Technology at the Department of Science and Engineering of Matter, Environment and Urban Planning, Faculty of Engineering, Polytechnic University of Marche (Ancona, Italy).

He teaches Materials Science and Technology, Corrosion and Protection of Materials, and Plastics Technology in Bachelor's and Master's degree programmes in Mechanical and Biomedical Engineering. His research activity is primarily focused on the corrosion and protection of metallic materials, with particular emphasis on stainless steels, galvanized steel, reinforced concrete systems, and corrosion-related degradation phenomena. His work involves the use of electrochemical techniques, accelerated and natural exposure tests, corrosion monitoring systems, and failure analysis. He is also active in the characterisation of polymeric materials, particularly through thermal analysis techniques.

He is the author or co-author of more than 200 scientific publications, including 98 papers in indexed international journals, and has participated in several research projects at regional, national, and European levels.

In addition to his academic activity, he has carried out numerous consultancy and applied research projects for industry, addressing corrosion-related issues, materials selection, durability assessment, failure analysis, and the development of protection strategies.

Prof. Bellezze is Vice Chair of the Technical Committee on Corrosion of the Italian Association of Metallurgy (AIM). He is also a member of the Italian Association of Materials Engineering (AIMAT) and the Italian National Interuniversity Consortium of Materials Science and Technology (INSTM).
