

11-13 May 2026 - Milan, Italy

www.aimnet.it/eec2026

EEC 2026 & EMECCR 2026 will be jointly held by AIM, Italian Association for Metallurgy, in Milan on 11-13 May 2026, together with **siderweb FORUM!**

The **EEC 2026** (14th European Electric Steelmaking conference) will cover a wide range of topics related to the production of steel using electric arc furnaces (EAFs) and other electric-based processes. The **EMECCR** (International Conference on Energy and Material Efficiency and CO₂ Reduction in the Steel Industry) has become a recognized forum for high level discussions on environmental related topics such as CO₂ reduction, materials efficiency and product life cycles in the steel industry worldwide.

EEC 2026 & EMECCR 2026 will provide opportunities for networking with industry leaders, researchers, and policymakers, discussing collaborative projects and partnerships.

Registration fees and participation details are available at www.aimnet.it/eec2026/register/

siderweb FORUM is the 2nd edition of the biennial event organised by siderweb to discuss the present and future of Italian and European steel.

The Conferences will be enriched with an exhibition, where sponsors will be able to display new technologies and equipment. The detailed exhibiting and sponsorship packages are available at www.aimnet.it/eec2026/exhibition-sponsorship/
