

ZIJIAN QIAO

Zijian Qiao received the B.Eng. degree in electronic information and engineering from Liaoning Petrochemical University, Fushun, Liaoning, China, in 2012, the master's degree in control theory and control engineering from the Lanzhou University of Technology, Lanzhou, China, in 2015, and the Ph.D. degree in mechanical engineering from Xi'an Jiaotong University, Xi'an, China, in 2020.

He currently holds the position of Associate Professor of mechanical engineering with the School of Mechanical Engineering and Intelligent Manufacturing, Ningbo University, Ningbo, China. Meanwhile, now he is the visiting scholar of Department of Mechanical and Aerospace Engineering, The Hong Kong University of Science and Technology, China and Department of Mechanical and Aerospace Engineering, Politecnico di Torino, Italy.

His research interests include nonlinear dynamics, weak signal detection, mechanical fault diagnosis, machine learning, intelligent medical equipment, remaining useful life prediction and structural health monitoring. He has published more than 80 papers and served as editorial board members and guest editors of more than 15 international journals, and international technical program committee members of more than 10 conferences.

He has served as the reviewers of more than 60 international journals indexed by SCI.
